www.northernschoolstrust.co.uk

Outstanding schools who deliver outstanding practice and student progress year-on-year are based on one common key foundation – continuous school based CPD. We are meeting as Northern Schools Trust for the sixth time on 22nd December 2017 in order to continue our work towards our vision: to establish world class, secondary and specialist schools that are centres of excellence for personal development, leadership, teaching and learning.

Our collective focus is on providing exceptional, life changing opportunities for students from a wide range of social and economic backgrounds, many of whom have experienced exceptional levels of economic and social deprivation.

As colleagues we are committed to providing opportunities for our students to truly achieve their potential and not only raise aspirations but actually deliver them. To achieve this we must continue to challenge and develop our own practice. This commitment ensures we are constantly striving for outstanding learning and teaching that is not constrained by external parameters or past experiences.

We trust you have an enriching day, and we would like to extend to you all our warmest wishes over the festive period.
