We recognise that in these challenging times the role each of us play grows ever more important in order to reach our collective goal of having outstanding schools which deliver outstanding practice and student progress year-on-year. To achieve this we must continue to challenge and develop our own practice. This personal commitment ensures we are all constantly striving for high standards that are not constrained by external parameters or past experiences.

We are meeting as Northern Schools Trust for the seventh time on 29th June 2018 in order to continue our work towards our vision: to establish world class schools that are centres of excellence for personal development, leadership and teaching and learning.

Whilst our collective work focus is on providing exceptional, life changing opportunities for our students, we must also remember to keep an eye on ourselves. The morning focus for today's One Vision day is staff and student wellbeing, with a focus on mental health and providing practical ways to help us in our day to day work. The afternoon sessions will allow us to develop our practice further in sessions appropriate to our work roles.

We hope you all have an enjoyable and thought-provoking day.
